

HIMANSHI VAISHNAV, XII - D

Corona-a pandemic

Started in december, but the end is not clear,
Quarantine yourself otherwise the consequences
you will have to bear

Corona is pandemic, has annihilated many lives
One who will stay home, will only survive
Clean your hands with soap or alcohol-based
hand rub

Cover your nose or mouth with bent elbow or tissue
when you sneeze or cough

Seek medical attention in case of fever, cough
and difficulty in breathing

Maintain a safe distance from anyone who is
coughing or sneezing

Police officers are striving to keep the streets and
parks vacant

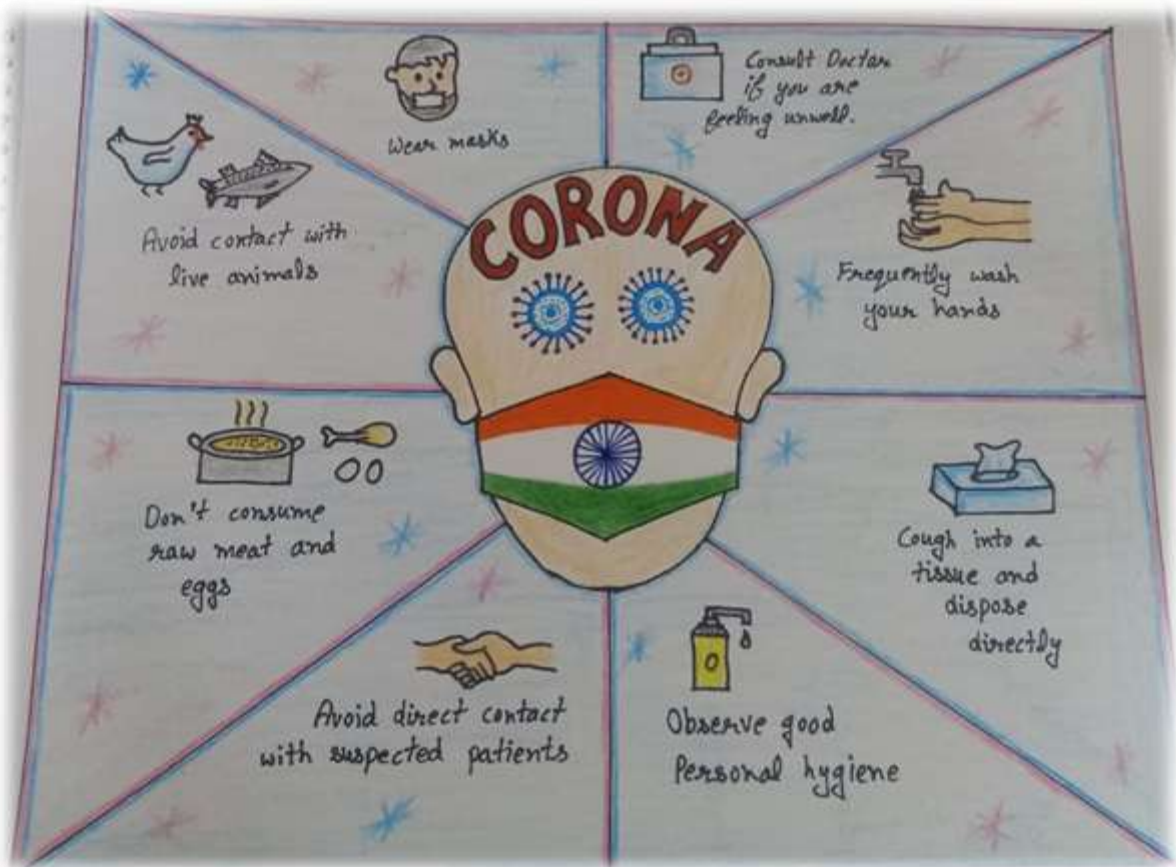

Wearing masks, social distancing and washing
hands are the things that are more significant

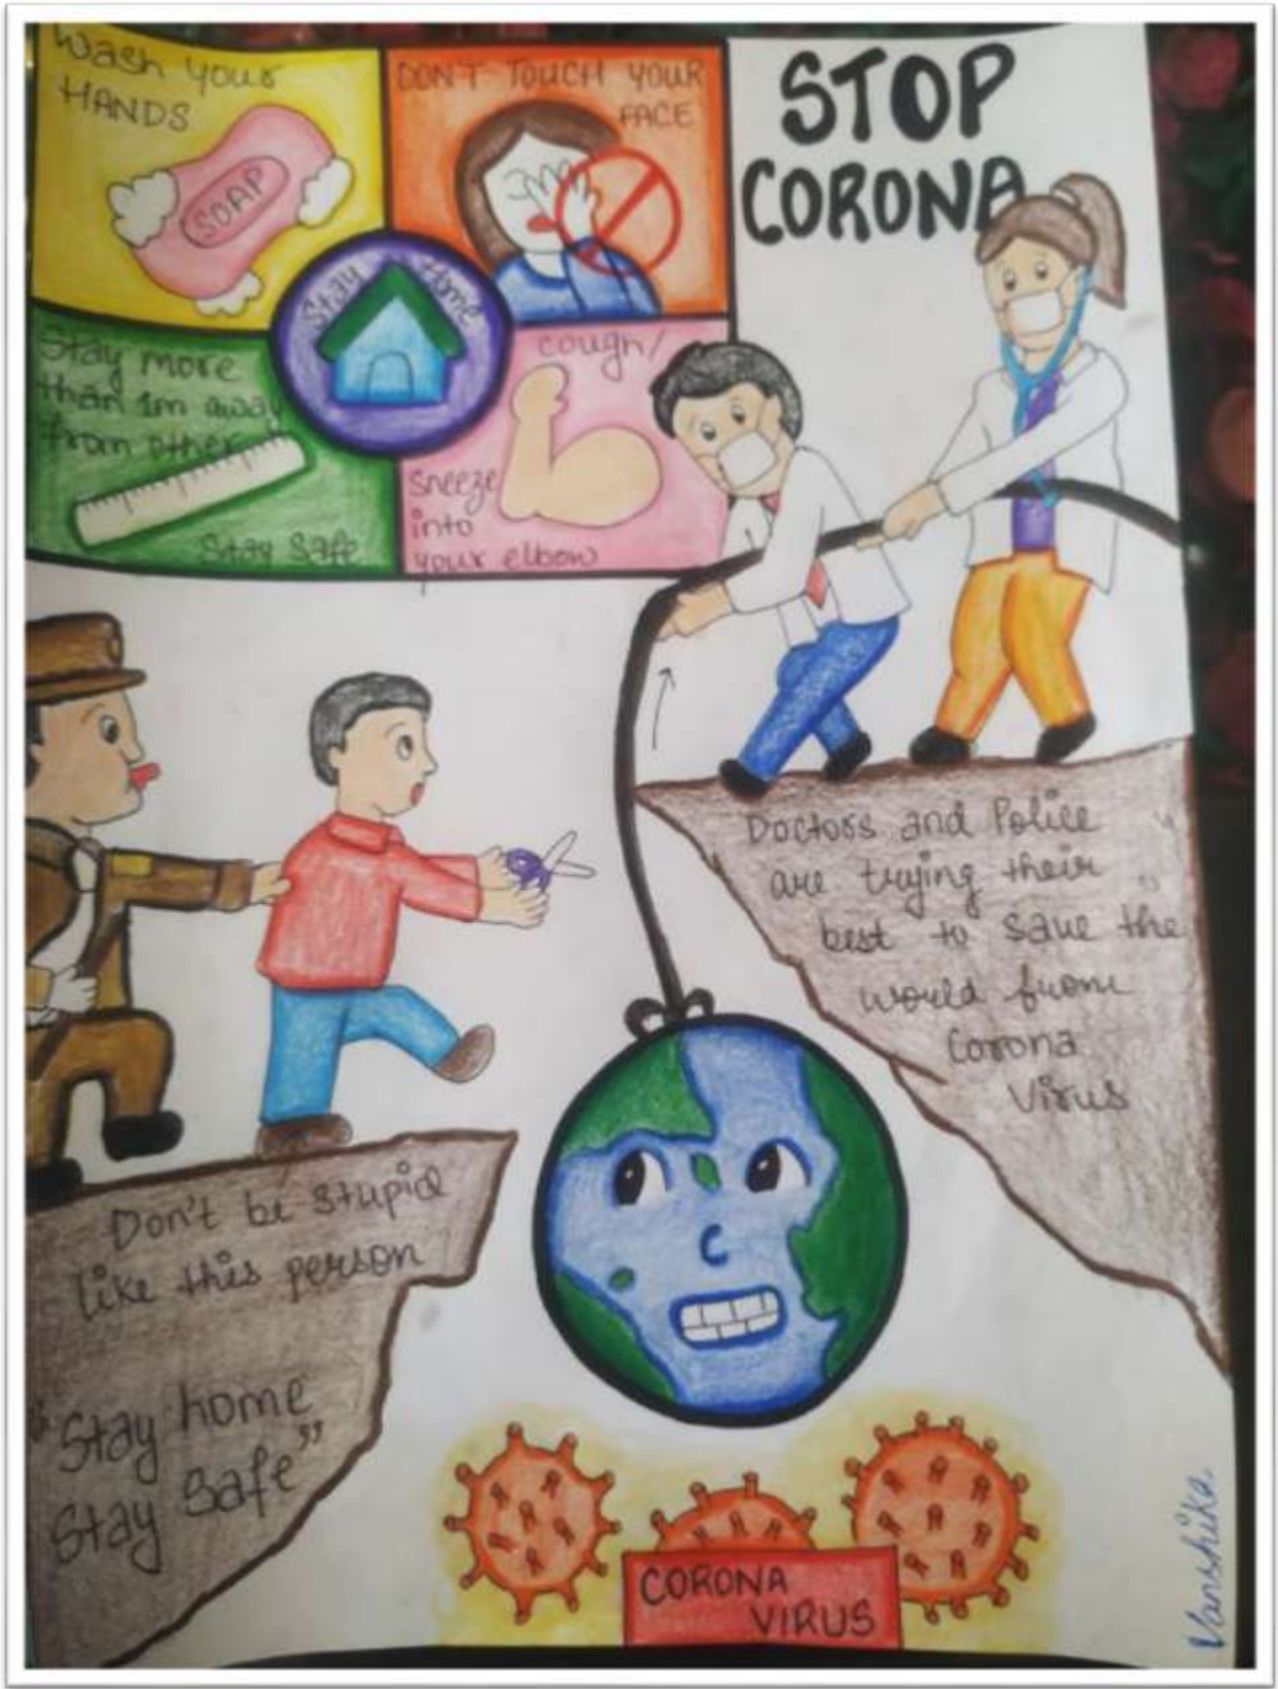

Doctors are curing patients by risking their lives
They are doing selfless activity without caring
about their children, relatives and wives

Exposing themselves to danger Journalists are
providing us with all the information regarding
virus

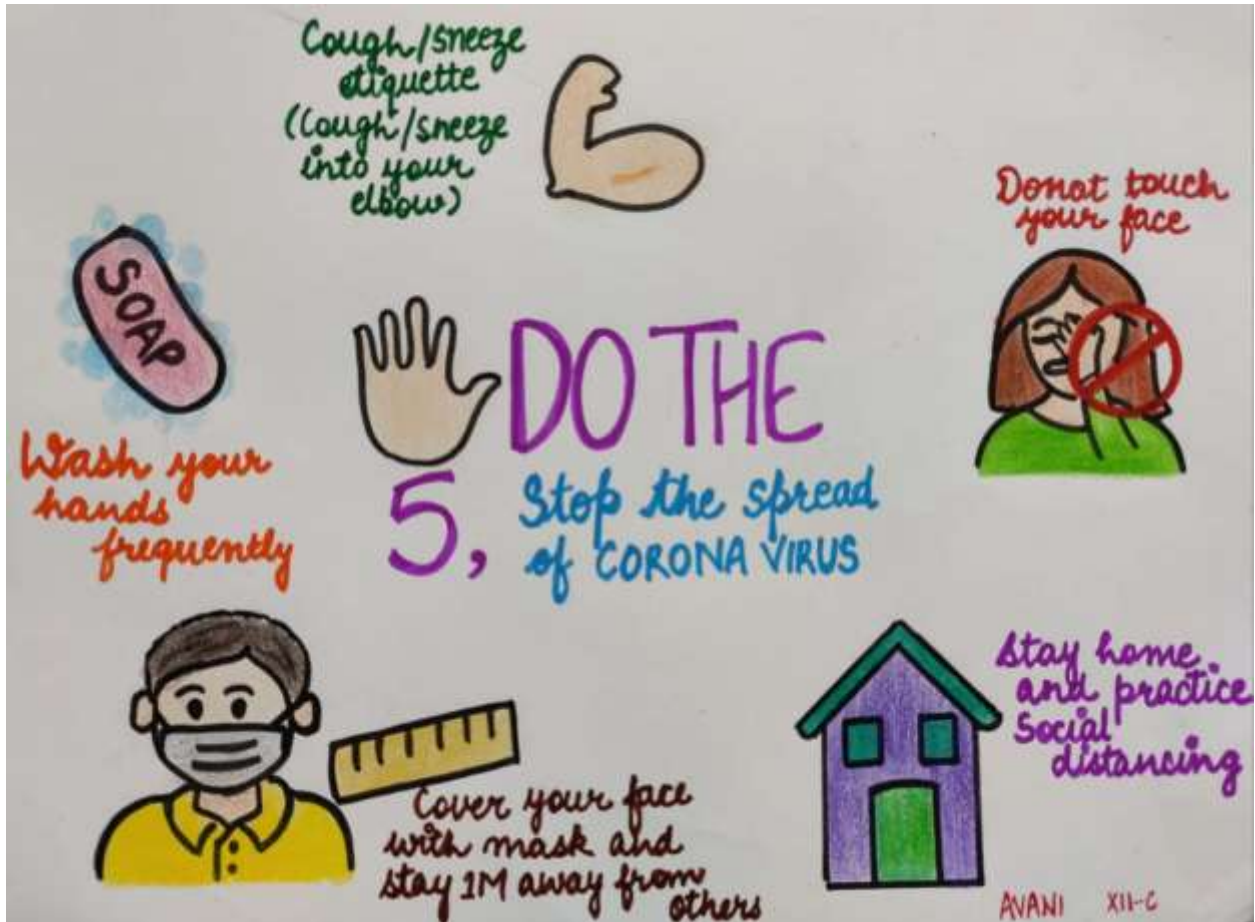

Stay home and stay safe otherwise the things
might be more dangerous.
